PROFILE

Motivated and inquisitive Computer Engineering graduate with a passion for understanding the intricacies of the world. Highly organized and adept at simplifying complex tasks. Proven track record of setting attainable objectives and committing wholeheartedly to their accomplishment. Recognized by peers for the ability to explain even the most challenging academic concepts with ease. Thrives in a collaborative team environment and takes pride in assisting others to meet project deadlines effectively.

WORK EXPERIENCE

Frontend Web Developer (Oct, 2022 - Feb, 2023)

BITSMITH TECHNOLOGIES PVT LTD

- Contributed in the development of the frontend and UI migration for the company's flagship product, leveraging ReactJS and AntDesign to create a user-friendly and visually appealing interface.
- Successfully led and coordinated a team of developers, optimizing productivity by efficiently scheduling tasks and overseeing day-to-day operations using **JIRA**.
- Demonstrated expertise in **React.js**, WordPress, and the **MERN Stack**, while consistently applying exceptional problem-solving skills to tackle complex challenges and ensure project success.

Business Development Associate Intern (Apr, 2022 - Oct, 2022)

BITSMITH TECHNOLOGIES PVT LTD

- Leveraged web content writing expertise to craft compelling and engaging content, contributing to improved brand awareness and lead generation.
- Executed successful content marketing campaigns, collaborating with cross-functional teams to target key audiences and achieve business objectives.

PROJECTS

Plethora - A Training and Placement management system for college

- Developed an Enterprise Resource Planning Web Application from scratch using: **ReactJS**, **AntDesign**, Java, **SpringBoot**, Spring Security, **MySQL**, and JWT Authentication.
- Seamlessly empowers students with the ability to track upcoming companies and apply for placement drives, while providing TPOs a comprehensive platform to manage student activities and drive statuses effectively.
- Ensured data security and user authentication through advanced features such as **Spring Security** and **JWT Authentication**, safeguarding sensitive information and providing a trusted platform for both students and TPOs.

HITA - A Document Generator made using Django

- The user fills in the required data in the form fields. This data is collected and stored in a database and a document is generated on it's basis, The generated text document is then saved to a specified location on the server and sent to the user via email with the help of **Bootstrap** and **Django**

CERTIFICATIONS

- Google Cloud Ready - **Google Cloud Skill Boost**
- Python Data Structures - **University of Michigan** via Coursera
- Developing Front-End Apps with React - **IBM** via Coursera
- Foundations of Digital Marketing and E-Commerce - **Google** via Coursera
